

How to change tickets picture

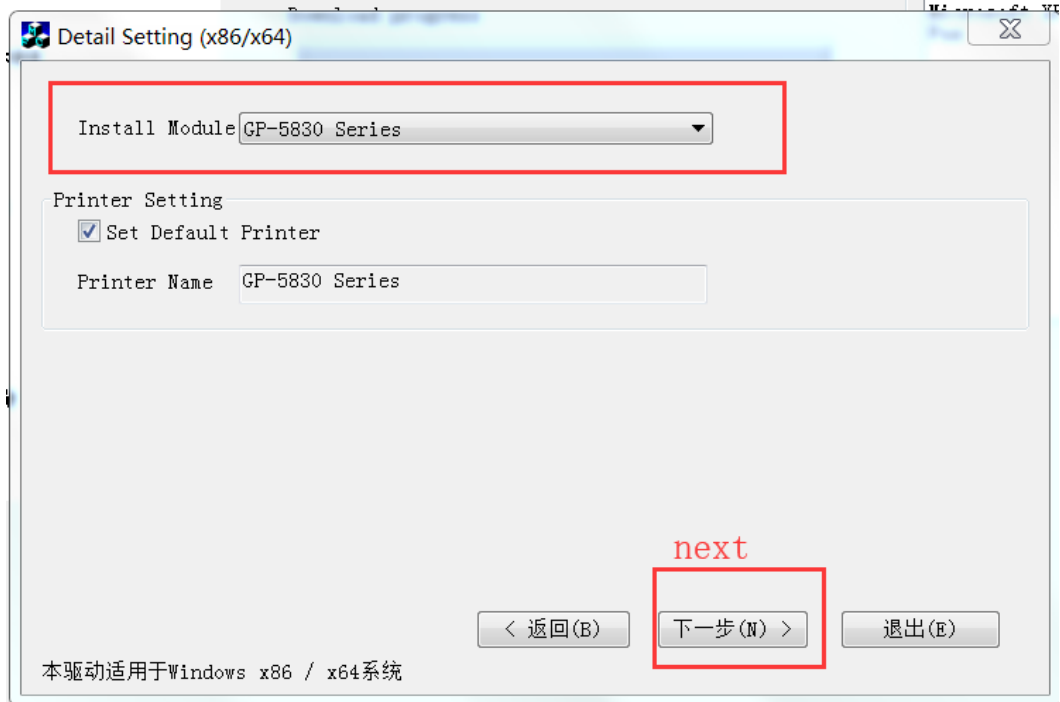

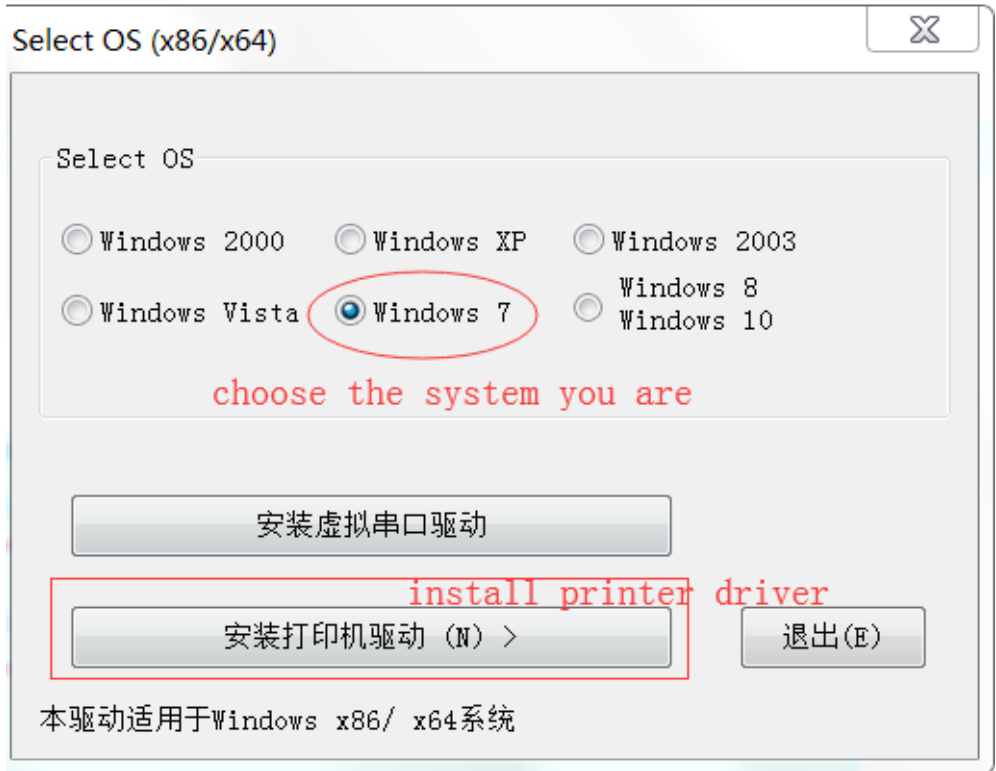

1. Turn on printer and connect USB cable to printer and PC

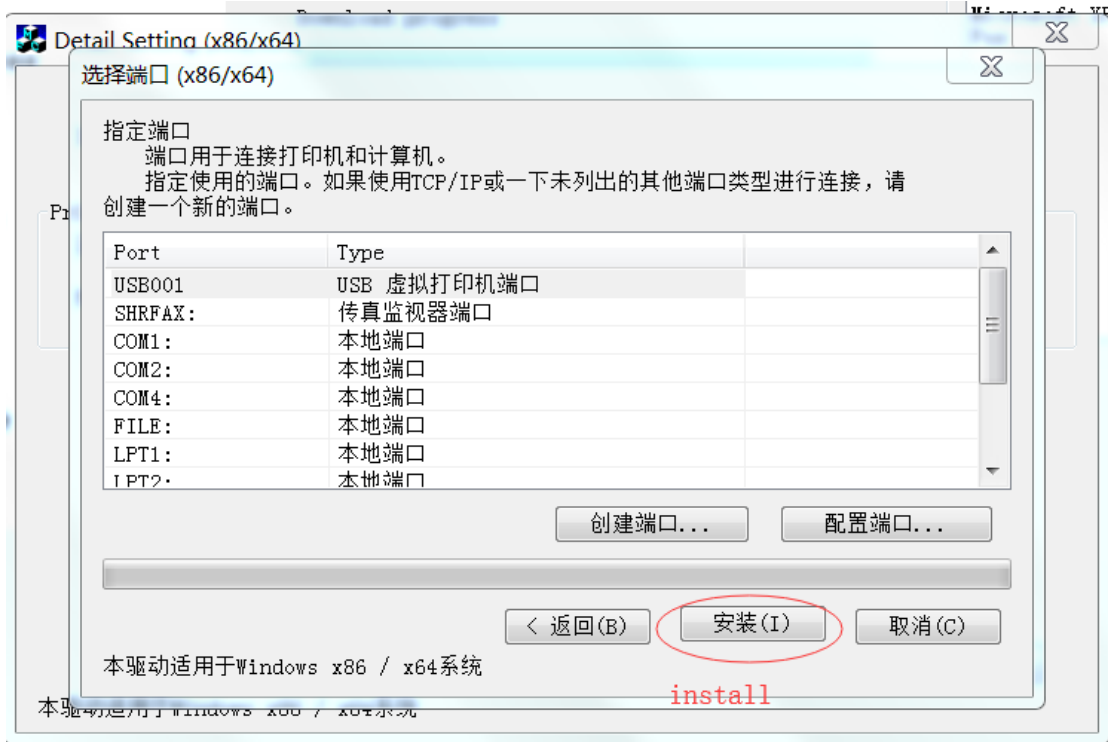

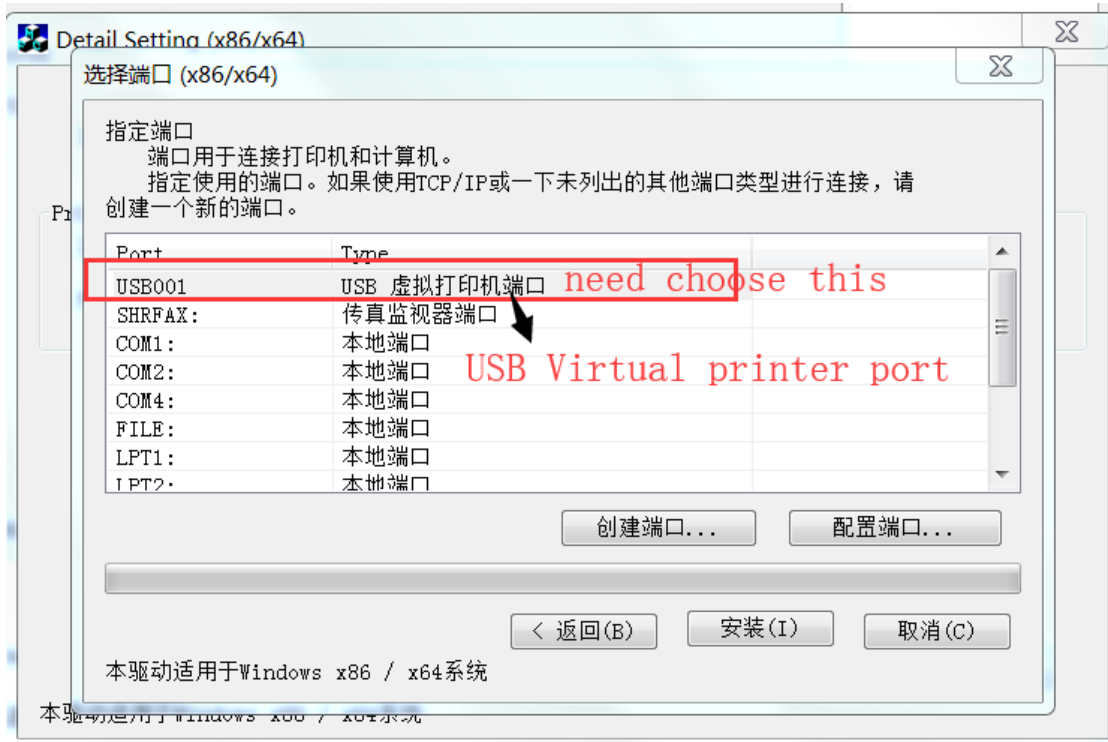

2. Install USB driver

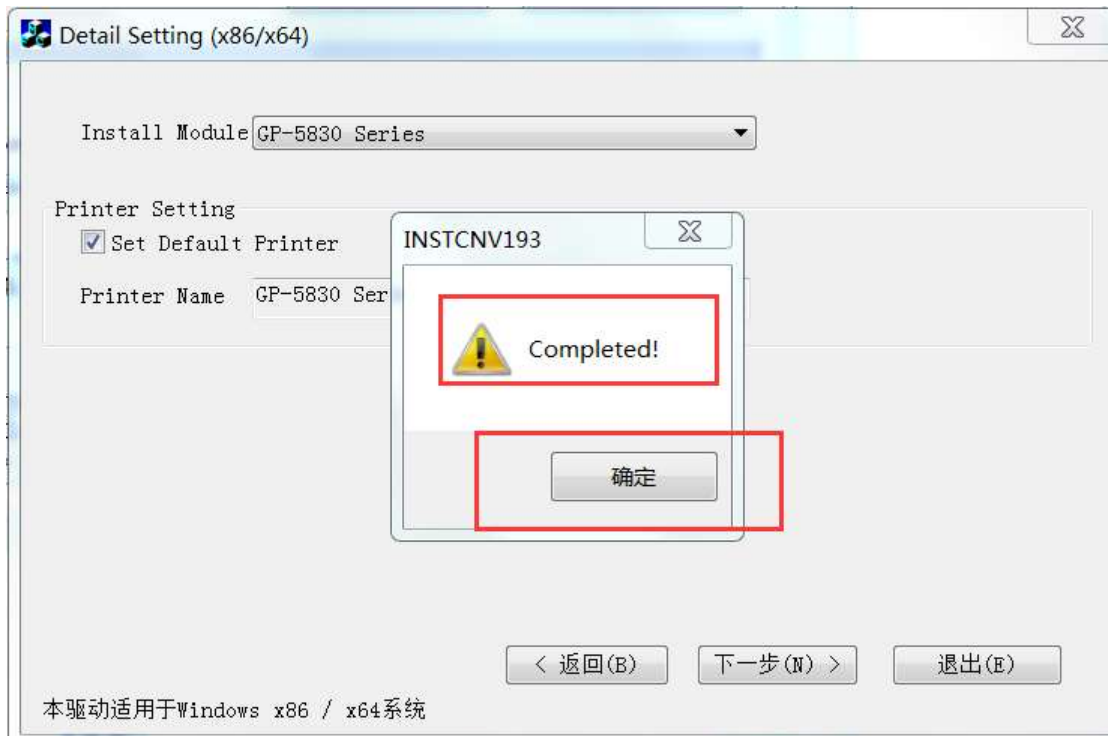

Right click this icon

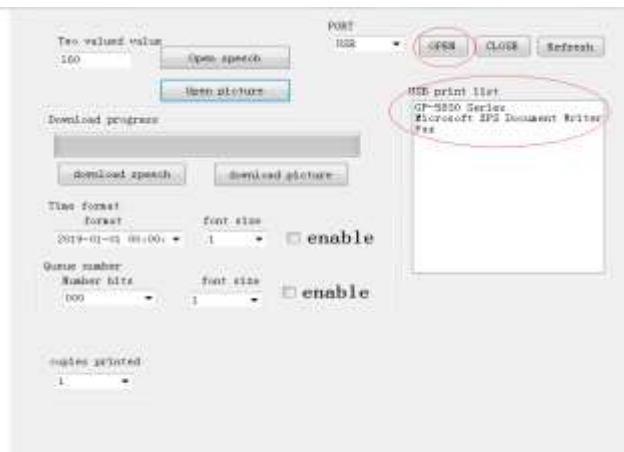

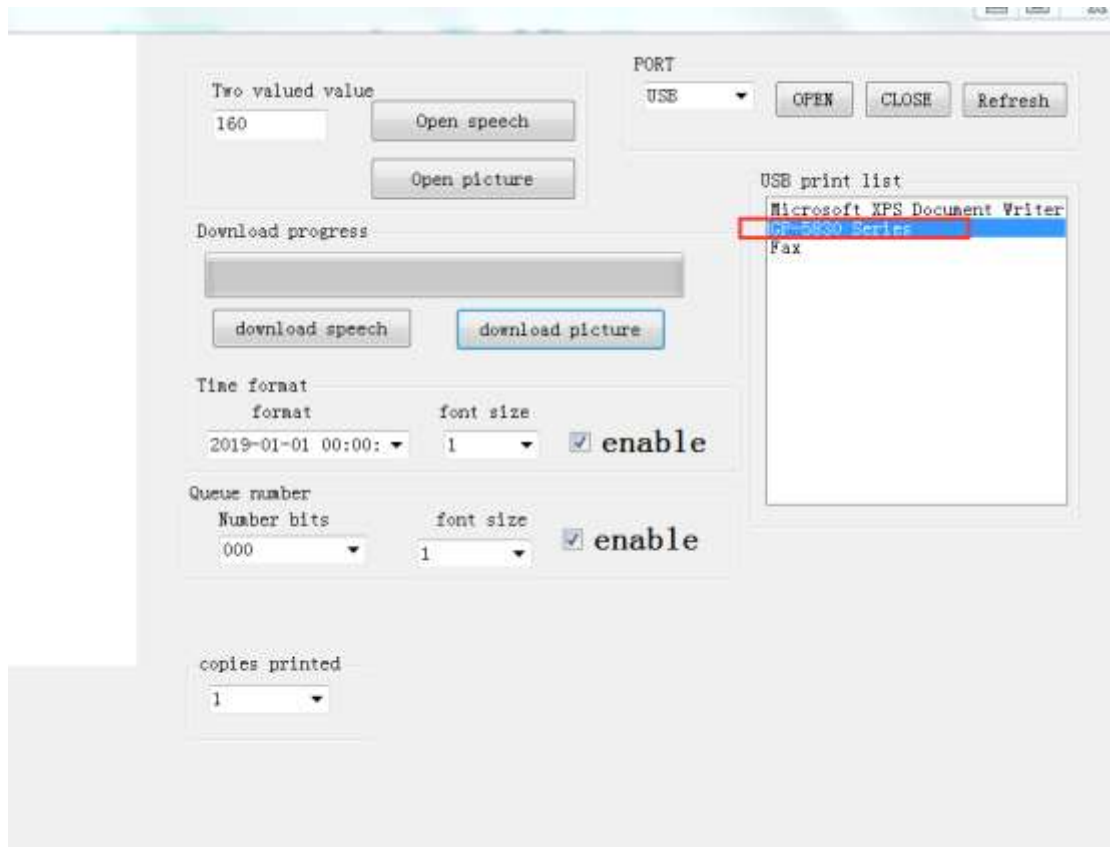

3. After installing USB driver, right click print software icon () and select “run as an administrator”

Then click “open” , USB print list will show in the text box as below. This means the connection between the printer and PC was successful. You then select **GP-5830** .

4. Click :open pictures and select your preferred JPEG image from your gallery. Enable the time format and queue number check boxes. Select time format and queue number from the drop down menu . Drag time and number to where you want it to appear on the image. Then click download picture and select ok
